PROFILE

Software engineer building web and mobile applications, backend systems, and integrations for business operations. Experience spans database design, REST APIs, authentication, payments, testing, and deployment.

SELECTED PROJECTS

Titan Verification Center - System architecture, database design, and Laravel verification workflows for public device checks, agent registration, and reviewed ownership transfers.

SaukiGlobal - Developed a React Native and Expo Android app, integrated backend APIs, tested service workflows, and deployed to Google Play.

BuyDigital Services - Contributed to payment API integrations and workflow automation for a digital services platform supporting exam PIN vending and payment processing.

EXPERIENCE

Software Engineer | Independent Projects & Contract Development | 2021 to present
Built PHP and MySQL systems for guest records, transaction tracking, and small-business operations, with role-based workflows and administrative dashboards.

TECHNICAL SKILLS

Backend and data: PHP, Laravel, Yii2, Node.js, Firebase, MySQL, REST APIs
Web and mobile: JavaScript, TypeScript, React, Vue.js, React Native, Expo, Capacitor
Delivery: Git, shared hosting, cloud hosting, VPS, Google Play Console, Apple App Store

EDUCATION

National Diploma in Computer Science | Nuhu Bamalli Polytechnic, Zaria | 2024 | Distinction

Professional Diploma in Computer Science | Iya Abubakar Institute of Computing and ICT, Ahmadu Bello University | 2022

ADDITIONAL TRAINING

Microsoft Power BI for Business Intelligence (Advanced), Excel for Data Analysis, Introduction to Statistics
